3D BRAND & PACKAGE DESIGN

Tridimage is an integrated graphic and structural packaging design consultancy, based in Buenos Aires, Argentina. We have been producing creative and distinctive branding solutions for clients worldwide since 1995.

We possess a blend of strategic thinking, boundless 3D creativity, commercial savvy, and flawless execution. Our extensive experience in 2D and 3D packaging spans across all industries, including food and beverage, home care, health and beauty, technology and durable goods.

Our packaging designs are backed up by our sound knowledge of manufacturing processes, materials and cost constraints, giving our clients a point of difference in an evermore competitive marketplace. At Tridimage we believe that successful packaging reflects the brand positioning, stands out, has conviction and is cost effective in its application.

We run all of our design projects, many of them for clients around the world, from our Buenos Aires studio. Today's technology allows the communication of ideas, creative work and instant access to local market intelligence necessary for the smooth running of a design project from global to local.
